

CHANGES TO YOUR DRUG LIST

More generics and low-cost brands to help you stay healthy and save money

Every year, the cost of prescription medication rises. To help lower your costs, we are updating the Cigna Prescription Drug List to feature more affordable medications.

Medications where you may pay more

Starting January 1, 2016, some brand name medications will be considered non-preferred brand. This means that if you continue to fill a prescription for one of these medications after January 1, 2016, your costs may be higher at the pharmacy.

NON-PREFERRED BRAND MEDICATION	GENERIC AND/OR PREFERRED BRAND ALTERNATIVE	CONDITION/Common Use/ DRUG CLASS
Bydureon, Byetta, Tanzeum	Trulicity, Victoza	Diabetes (non-insulin)
Fentora	Subsys	Pain Relief and Inflammatory Disease (transmucosal fentanyl)

Medications not covered on your drug list*

Additionally, starting January 1, 2016, several brand name medications will no longer be covered on your prescription drug list.* This means that if you continue to fill a prescription for one of these medications after January 1, 2016, you'll have to pay the full cost of the medication.

What you should do

Talk with your doctor to see which one of the generic or preferred brand alternatives might be right for you.

If you received **approval from Cigna** to have one of the medications listed above covered under your plan, **you can continue to take that medication until your approval period runs out**. Before the approval runs out, you should talk to your doctor about switching to a generic or preferred brand alternative listed above.
